

Tunnel Books

Using receding planes to create depth and perspective

“HAPPY PLACE” TUNNEL BOOKS

Objective: After we do a visualization of places that make us feel happy, calm, relaxed, joyous, etc, you will each create a tunnel book comprised of multiple planes of depth in order to illustrate what this place looks like for you.

Each tunnel book should demonstrate an understanding of scale and atmospheric perspective, as well as one or two point perspective where appropriate in order to illustrate the scene.

MAJORS: Books must consist of at least 4 layers

MINORS: Books must consist of at least 3 layers
