

# COMPOSITIONAL

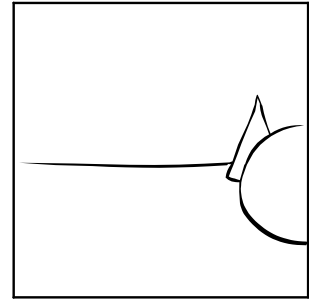

too small, and dead center!

touching edges

heights of objects  
are too close

too much negative space

## WAYS TO MAKE A COMPOSITION MORE INTERESTING

**Overlap objects-** it looks boring if your objects are simply lined up in a row.

**Vary the size of objects-** place some objects closer to the viewer and some farther away  
to get a sense of depth.

**Use the Rule of Thirds** (see back).

In the box below, use the rule of thirds and the objects provided to create  
a compelling composition. Try to vary the size of objects and use scale too!  
Please include a horizon line as well.
